

SMACD 2025

International Conference on Synthesis, Modeling, Analysis and Simulation Methods and Applications to Circuit Design

The 2025 edition of the International Conference on Synthesis, Modeling, Analysis and Simulation Methods, and Applications to Circuit Design (SMACD) will be held in **Istanbul**, organized by **Gebze Technical University** and **Istanbul Bilgi University**. SMACD is a forum devoted to modeling, simulation, and synthesis for Analog, Mixed-signal, RF (AMS/RF), and multi-domain (nanoelectronics, biological, MEMS, optoelectronics, etc.) integrated circuits and systems, as well as emerging technologies and applications. Open- source tools and methods for IC design and experiences with modeling, simulation, and synthesis techniques in diverse application areas are also welcomed. Objective technologies include CMOS, beyond CMOS, and More-than-Moore such as MEMs, power devices, sensors, passives, etc. Also, SMACD has a thrilling and dynamic event, called **EDA Competition**, where M.Sc. and Ph.D. students can compete with their best ideas, methodologies, flows and tools with one unique yet challenging goal: **enhance design automation for integrated circuits and systems**. Another attractive event is **IC Design Contest**, where M.Sc. and Ph.D. students can compete with their designs to reach one unique yet challenging goal: **enhance integrated circuits and systems design**. SMACD has been technically co-sponsored by the **IEEE, IEEE CEDA and IEEE CASS**, and its proceedings has been published in **IEEE Xplore**.
